

Kreative

- *This is a web application that allows artistic professionals to offer their services to users willing to pay for them. Talented individuals will be able to share or create a visual portfolio within the application for potential customers to view. This web application will offer payment facilitation between talent and customer. It will also offer communication channels between both parties.*

Here are the functions that users should expect:

- As a user, I want to search for a service, so that I can hire them.
- As a user, I want to view a professionals portfolio, so that I can decide who is best.
- As a user, I want to pay for a professionals services within the app, so I can avoid confusion.
- As a user, I want to chat with a professional, so that we can figure out the details of the service.
- As a user, I want to write a review for a service, so that future users can refer to them.
- As a professional, I want to create or edit my portfolio, so that I can share my best work.
- As a professional, I want to create or edit my profile, so that I can share my personal information.
- As a professional, I want to set my own prices, so that I can receive value for my work.
- As a professional, I want to set my own time frames, so that users know how long to expect for services.
- As a professional, I want payment to be finalized within the app, so that confusion is avoided.
- As a business, I want to receive a percentage of finalized service payment, so that the business is sustainable.
- As a business, I want to offer location based suggestions for services, so that local talent is emphasized.
- As a business, I want the application to be available on all platforms, so that it can reach all potential users.
